Price Schedule Forms

[Note to the Procuring Agency:

As the ITB indicates, each line item will be evaluated on its own and determination for conclusion of Framework Agreement made on the basis of the most advantageous bid for a line item. It is therefore important that the line item should to the extent practically possible be a complete set, and not components of a set (unless the procurement itself is for procurement of components), whose technical requirements and functional performance as applicable could be described. As an example, if this Framework Agreement includes the procurement of commonly needed equipment, the line item would be the required equipment.

If there is a need to specify sub-items, the corresponding sub-item information should be inserted. This is then eventually aggregated to determine the line item prices (bid price) entered by the bidder in the Price Schedule Summary.

Two set of Price Schedule templates are provided based on: (i) range of Call-off quantities and (ii) estimated quantities over the FA period respectively. The Procuring Agency shall use either one of the sets depending on the type of FA and delete the other.

For Single-Supplier FA, providing the estimated quantities of items over the FA should reasonably enable bidders to offer their unit prices in a competitive manner. However, for Multi-Supplier FA, the Procuring Agency may choose, depending on the nature and type of procurement, to provide either the estimated quantities over the FA period or the indicative range of call off quantities.]

The Bidder shall fill in these Price Schedule Forms in accordance with the instructions indicated. The list of line items in column 1 of the **Price Schedules** shall coincide with the List of Goods and Related Services specified by the Procuring Agency in the Schedule of Requirements.

- c. In addition to the legal remedies set out in the relevant Legal Agreement, may take other appropriate actions, including declaring misprocurement, if the Bank determines at any time that representatives of the Borrower or of a recipient of any part of the proceeds of the loan engaged in corrupt, fraudulent, collusive, coercive, or obstructive practices during the procurement process, selection and/or execution of the contract in question, without the Borrower having taken timely and appropriate action satisfactory to the Bank to address such practices when they occur, including by failing to inform the Bank in a timely manner at the time they knew of the practices;

Notes for Preparing the Estimate Schedule of Requirements

[The Estimate Schedule of Requirements shall be included in the RFB document by the Procuring Agency, and shall cover, at a minimum, a description of the Goods and Related Services, indicative total Quantities required over the term of the FA [or as applicable, indicative range of individual call-off quantities] that may be supplied under a Framework Agreement/s, Delivery Periods named place/s of destination and estimated requirements for Related Services, if any.

***As the ITB indicates, each line item will be evaluated on its own and determination for conclusion of Framework Agreement made on the basis of the most advantageous bid for a line item.** It is therefore important that the line item should to the extent practically possible be a complete set, and not components of a set (unless the procurement itself is for procurement of components), whose technical requirements could be described. As an example, if this Framework Agreement includes the procurement of commonly needed equipment, the line item would be the required equipment.*

If there is a need to specify sub-items, the corresponding sub-item information should be inserted.]

Estimated Schedule of Requirements- Supply of Goods

Technical Specifications

The purpose of the Technical Specifications (TS), is to define the technical characteristics of the Goods and Related Services required by the Procuring Agency.

As the ITB indicates, each line item will be evaluated on its own and determination for conclusion of Framework Agreement made on the basis of the most advantageous bid for a line item. It is therefore important that the line item should to the extent practically possible be a complete set, and not components of a set (unless the procurement itself is for procurement of components), whose technical requirements would be described in this section. As an example, if this Framework Agreement includes the procurement of commonly needed equipment, the line item would be the required equipment. If there is a need to specify sub-items, the corresponding sub-item technical requirements should be inserted.

The technical requirements may be as, appropriate, in the form of detailed technical specifications/characteristics or in the form of functional/performance requirements or both. A specification that provides the desired level of functionality/ performance allows technical approaches to achieving the Procuring Agency's functional and performance objectives. Such a specification could enable suppliers (particularly for specialized Goods) to bring their expertise, technology and innovation as appropriate.

When preparing the TS, the Procuring Agency shall take into account that:

- *The TS constitute the benchmarks against which the Procuring Agency will verify the technical responsiveness of Bids and subsequently evaluate the Bids. Therefore, well-defined TS will facilitate preparation of responsive Bids by Bidders, as well as examination, evaluation, and comparison of the Bids by the Procuring Agency.*
- *The TS shall require that all Goods and materials to be incorporated in the Goods be new, unused, and of the most recent or current models, and that they incorporate all recent improvements in design and materials, unless provided for otherwise in the contract.*
- *The TS shall make use of best practices. Samples of specifications from successful similar procurements in the same country or sector may provide a sound basis for drafting the TS.*
- *The Bank encourages the use of metric units.*
- *Standardizing technical specifications may be advantageous, depending on the complexity of the Goods and the repetitiveness of the type of procurement. Technical Specifications should be broad enough to avoid restrictions on workmanship, materials, and equipment commonly used in manufacturing similar kinds of Goods.*
- *Standards for equipment, materials, and workmanship specified in the RFB document shall not be restrictive. Recognized international standards should be specified as much as possible. Reference to brand names, catalogue numbers, or other details that limit any*

materials or items to a specific manufacturer should be avoided as far as possible. Where unavoidable, such item description should always be followed by the words “or substantially equivalent.” When other particular standards or codes of practice are referred to in the TS, whether from the Borrower’s or from other eligible countries, a statement should follow other authoritative standards that ensure at least a substantially equal quality, then the standards mentioned in the TS will also be acceptable.

- *Technical Specifications shall be fully descriptive of the requirements in respect of, but not limited to, the following:*
 - (a) *Standards of materials and workmanship required for the production and manufacturing of the Goods.*
 - (b) *Any sustainable procurement technical requirements shall be clearly specified. Please refer to the Bank’s Procurement Regulations for Borrowers and Sustainable procurement guidance for further information. The sustainable procurement requirements should be consistent with the objectives of the procurement. The requirements shall be specified to enable their evaluation. To encourage Bidders’ innovation in addressing sustainable procurement requirements, as long as the Bid evaluation criteria specify the mechanism for monetary adjustments for the purpose of Bid comparisons, Bidders may be invited to offer goods that exceed the specified minimum sustainable procurement requirements.*
 - (c) *If the procurement has been assessed to present potential or actual cyber security risks, the Procuring Agency shall specify cyber security requirements, including cyber security accreditations as appropriate.*
 - (d) *If there are supply chain risks, the Procuring Agency shall require the Bidder to include its assessment of supply chain risks and proposal to manage the risks.*
 - (e) *Detailed tests required (type and number).*
 - (f) *Other additional work and/or Related Services required to achieve full delivery/completion.*
 - (g) *Detailed activities to be performed by the Supplier, and any relevant activities by the Procuring Agency.*
 - (h) *List of detailed functional guarantees covered by the Warranty and the specification of the liquidated damages to be applied in the event that such guarantees are not met.*
- *[The TS shall specify all essential technical and performance characteristics and requirements, including guaranteed or acceptable maximum or minimum values, as appropriate. Whenever necessary, the Procuring Agency shall include an additional ad-hoc Bid form (to be an Attachment to the Letter of Bid), where the Bidder shall provide detailed information on such technical performance characteristics in respect to the corresponding acceptable or guaranteed values.]*

[When the Procuring Agency requests that the Bidder provides in its Bid a part or all of the Technical Specifications, technical schedules, or other technical information, the Procuring

Agency shall specify in detail the nature and extent of the required information and the manner in which it has to be presented by the Bidder in its Bid.]

[If a summary of the Technical Specifications (TS) has to be provided, the Procuring Agency shall insert information in the table below. The Bidder shall prepare a similar table to justify compliance with the requirements]

2.2 To this end, the Bank:

- a. Defines, for the purposes of this provision, the terms set forth below as follows:
 - i. "corrupt practice" is the offering, giving, receiving, or soliciting, directly or indirectly, of anything of value to influence improperly the actions of another party;

 - iii. "collusive practice" is an arrangement between two or more parties designed to achieve an improper purpose, including to influence improperly the actions of another party;
 - iv. "coercive practice" is impairing or harming, or threatening to impair or harm, directly or indirectly, any party or the property of the party to influence improperly the actions of a party;
 - v. "obstructive practice" is:

 - (b) acts intended to materially impede the exercise of the Bank's inspection and audit rights provided for under paragraph 2.2 e. below.

- b. Rejects a proposal for award if the Bank determines that the firm or individual recommended for award, any of its personnel, or its agents, or its sub-consultants, sub-contractors, service providers, suppliers and/ or their employees, has, directly or indirectly, engaged in corrupt, fraudulent, collusive, coercive, or obstructive practices in competing for the contract in question;
- c. In addition to the legal remedies set out in the relevant Legal Agreement, may take other appropriate actions, including declaring misprocurement, if the Bank determines at any time that representatives of the Borrower or of a recipient of any part of the proceeds of the loan engaged in corrupt, fraudulent, collusive, coercive, or obstructive practices during the procurement process, selection and/or execution of the contract in question, without the Borrower having taken timely and appropriate action satisfactory to the Bank to address such practices when they occur, including by failing to inform the Bank in a timely manner at the time they knew of the practices;
- d. Pursuant to the Bank's Anti- Corruption Guidelines and in accordance with the Bank's prevailing sanctions policies and procedures, may sanction a firm or individual, either indefinitely or for a stated period of time, including by publicly declaring such firm or individual ineligible (i) to be awarded or otherwise benefit from a Bank-financed contract, financially or in any other manner;⁶ (ii) to be a nominated⁷ sub-contractor, consultant, manufacturer or supplier, or service provider of an otherwise eligible firm being awarded a Bank-financed contract; and (iii) to receive the proceeds of any loan made by the Bank or otherwise to participate further in the preparation or implementation of any Bank-financed project;

⁶ For the avoidance of doubt, a sanctioned party's ineligibility to be awarded a contract shall include, without limitation, (i) applying for pre-qualification, expressing interest in a consultancy, and bidding, either directly or as a nominated sub-contractor, nominated consultant, nominated manufacturer or supplier, or nominated service provider, in respect of such contract, and (ii) entering into an addendum or amendment introducing a material modification to any existing contract.

⁷ A nominated sub-contractor, nominated consultant, nominated manufacturer or supplier, or nominated service provider (different names are used depending on the particular bidding document) is one which has been: (i) included by the bidder in its pre-qualification application or bid because it brings specific and critical experience and know-how that allow the bidder to meet the qualification requirements for the particular bid; or (ii) appointed by the Borrower.

⁸ Inspections in this context usually are investigative (i.e., forensic) in nature. They involve fact-finding activities undertaken by the Bank or persons appointed by the Bank to address specific matters related to investigations/audits, such as evaluating the veracity of an allegation of possible Fraud and Corruption, through the appropriate mechanisms. Such activity includes but is not limited to: accessing and examining a firm's or individual's financial records and information, and making copies thereof as relevant; accessing and examining any other documents, data and information (whether in hard copy or electronic format) deemed relevant for the investigation/audit, and making copies thereof as relevant; interviewing staff and other relevant individuals; performing physical inspections and site visits; and obtaining third party verification of information.
