Financial Evaluation and Scoring System for Bids (Maximum Allocable Marks Score = 30 marks)

The financial bids of technically qualified bidders will be opened publicly at the time to be announced by the Procuring committee and the financial bids found technically non-responsive shall be returned un-opened to the respective Bidders. Total Allocable marks for Technical Proposal = 70

Total Allocable marks in Financial Proposal= 30 Total Combined Allocable Score for individual bids =Marks obtained in Technical Evaluation + Marks obtained in Financial Evaluation = 100

Scoring Methodology:

Contract will be awarded to the best evaluated fair and responsive bidder whose product ranks highest in the Combined Evaluation scoring calculated through the Marks awarded to Technical Proposal and Financial Proposal as stated in the Bid Data Sheet of these Standard Bidding Documents.

The Evaluation Methodology is a combination of non-price factors (in Technical Criteria) and price factor (in Financial Criteria)

Procedure for the Marks Scoring: Marks will be awarded or otherwise for various technical parameters to each quoted product based on the prescribed Technical and Financial criteria. The total combined marks will determine the highest-ranking product in each product category for contract award.

The formula to calculate the marks for the price by the bidders other than lowest bidder is given below:

Financial Evaluation Score of individual quoted Product: = [Lowest quoted Price of the item ÷ Next higher proposed Price of the competing item] x Total allocable financial score

Solved Example of Financial Scoring:

- If the lowest quoted price of an item is Rs. 100/-, the same lowest bidder will obtain score as below: = $[100 \div 100] \times 30 = 30$ marks, being the lowest bidder for the quoted item. If the next higher quoted price of the same item is Rs. 110/-, the marks obtained will be: = $[100 \div 110] \times 30 = 27.27$ Marks - If the next higher quoted price of the same item is Rs. 115/-, the marks obtained will be: = $[100 \div 115] \times 30 = 26$ Marks And so on.
